

Angelus Britannicus.

EPHEMERIS

For the Year of our Redemption, 1690.
Being the second after the Bissextile or Leap-Year.

The Creation of the World, 5639. A.
The Death of our Saviour, 1667.
The Conquest of this Nation, 624.
The Restauration of R. C. II. 308.
Since The Last great Plague, 25. Yea.
The Burning of London, 249.
The Last great Frost, 6.
The Death of R. Charles II.
The Departure of R. James. II.
The Restauration of our Laws.

Amplified with Observations
From the Sun's Ingress into the
Sign *ARIES*, and the other Cardinal
Points; with an Account of the Eclipses,
Conjunctions of the Planets, and other Con-
figurations of the Coelestial Bodies.

Calculated for the Meridian of the
famous City of London, where the
Pole Arctick is Elevated above the Horizon 51
Degr. 32 Min. but may indifferently serve for
ENGLAND, SCOTLAND, and IRELAND.

By John Tanner, Student in Physick and Astrology.
The and Thirty Fourth Impression.

Agunt, Non Cogunt.

LONDON, Printed by W. H. for the Company of
Stationers. 1690.

A Table of the exact time of the Moon's coming to the South for every day of the first six Months of the Year 1690. Serving to find out more exactly the time of high water in most of the eminent Ports in England, Scotland and Ireland, and other Ports adjacent.

January hath xxxi days.										
<p>My Capers'd must be. After garments rent, Amongst strange faces, languages unknown, Upon the willow hung her Instrument, And in sad silence did her self bemoan. Seeing truth mangled, into Dungeons thrust, Goodness and good Men prest to lick the dust.</p>

January 1690.

Month Days.

Dark and most dismal clouds obscur'd the sky
 We groap'd in darkness, no man knew his way
 Heavens light beseem'd by Rotten Sorcery
 Unto our drooping Spirits sent one ray
 Of warming comfort yields, and we gave o'er
 To hope Heaven would revolve as heretofore.

Lunations, and other Observations: Asp. & Weath.

1	Hotham the Son beheaded	Dark clouds.
2	Sr. John the Father 1644.	mist and frost.
3	King Charles II. Crown'd at Schoon	Sone rain or

February hath xxviii. days.

To talk of Law or pretend your Right,
Assur'd workmen were of Difficulty;
The Labor supported by the Monarch's might,
As filth befouling the Regality;
Cries on Northing's wisdom or Policy;
For Monarchs know no medium 'twixt the Two.

February 1690.

All Rules of Right, and Justice, which we must follow, that of
I thus will, thus command, and thus we must follow, that of
The Wonders of Nature, from a of a and which we must follow
Force upon force, alas! for thus we must follow, that of
We read this Wonders of Nature, full and complete, and thus we must follow
Despairing from this, and thus we must follow, that of

March hath xxxi days.

Men's pent up thoughts their Physionomy did show,
How much they did abhor the Martial Herd,
Their courage in obscurity did grow,
And whisper'd thus, not daring to be heard;
We'll fairly fall, and free men to our Graves
We'll chuse to go, rather than to be slaves.

To stop this growth, let us invent a Plot
(Quoth the high Priest) we'll put them in a rage,
And when enflam'd, we'll bring them to the pot,
And then as Rebels bring them on the stage:
One judges make, Another furies find,
Witnesses too, according to our mind.

April hath xxx days.

Month days.

Week days.

Thus Facing England lay, instead of bones
Hard stones being set for her, with stones
Instead of Filth and Scorpions for a bed,
This is the mercy of that still life be
With fair alligments, darling her eyes
And rob her under pretence of Liberty

April 1690.

Month Days.

Overgrown Prebendive, that English Rivers
It's poison spreads over Church and State
Did every honest Privileger see
Each one bewailing the unhappy fate
Thus in despair all sinking to the ground
No hopes of help beneath Heaven can be found.

Wetup. 1690.
MCCXC.

May hath xxxi days.

Heaven bless us, and immediately decree
 In mercy to remove our sad distress;
 And that without our aid we should be freed
 From those that cruelly did us oppress:
 Inspir'd a Prince, and rais'd his mind so high,
 Above what mortal contemplations lie.

June 1690.

Month Days.

Let Eastern Winds for ever be esteem'd
(Not inauspicious as heretofore)
The best of all the Points, let it be deem'd,
That brought deliverance to our British Shore:
Thanks to Confederate Friends, who're well inclin'd,
'Twas God the Seas rul'd, and did fix the wind.

B 2

July hath xxxi days.

No sooner set his Foot on English Land,
 All good Mens Hearts were lifted up on high,
 The bold Bravades stood trembling at a stand.
 Knew not what course to take, what way to try.
 More Vigour beats in every English Vein
 With warm Presages of a milder Reign.

*This savage kind at first his Power feels
The Conquer'd with the Conquerors content,
Seem'd joyful, skipp'd and lickt his Chariot wheels,
And spent loud Acclamations as he went.
But now ah! Rome's Spells, and the Coin of France,
Sets Knaves to piping, and the Fools to dance.*

September 1690.

Month Days.

Are London's Flames so soon to be forgot,
That you are longing for that British Crew?
Can you join to revive the Popish Plot,
So lately felt the last, the next might Rue?
Deluded Sots, whose Promises can trust,
Who to nought else but their Intentions just.

Lunations and other Observations. Aspects & weather.

November 1690.

Month Days.

Ask the poor Protestants in Ireland how,
They, like their Popish Neighbours, surely they
Will wonder at your readiness to Bow
Unto that Baal, which you could ne'er obey:
If French Dragooning you so much desire,
Plunge you your selves, not us into that Fire.

**A Table of the Four Terms, and their Returns, for
the Year, 1693. - 94.**

Hilary Term begins *January 23.* and ends *February 12.*
and hath four Returns.

Octab. Hil. January 21. } } *Craft. Purific. February 3.*
Quind. Hil. January 28. } } *Octab. Purif. February 10.*

Easter Term begins *May 7.* ends *June 2.*

and hath five Returns.

Quind. Pasch. May 5. } } *Quinque Pasch. May 25.*
Tres Pasch. May 12. } } *Craft. Ascens. May 30.*
Mens. Pasch. May 19.

Trinity Term begins *June 23.* ends *July 9.*

and hath four Returns.

Craft. Trin. June 16. } } *Quind. Trin. June 30.*
Octab. Trin. June 23. } } *Tres Trin. July 7.*

Michaelmas Term begins *October 23.* ends *November 28.*

and hath six Returns.

Tres Mich. October 20. } } *Craft. Martini Novemb. 13.*
Mens. Mich. October 27. } } *Octab. Mart. Novemb. 19.*
Craft. Anim. November 3. } } *Quind. Mart. Novemb. 26.*

Note. That the first and last days of every Term, are
the first and last days of Appearance.

Note. That the Exchequer opens eight days before
any Term, except *Trinity Term*, before which it opens
only four days.

The Glorious Planet *Venus* is Oriental of the Sun,
and is our bright Morning Star, until the 6. of *April*;
at which time she comes into Conjunction with the Sun,
and becomes Occidental, and is our Evening Star all
the Year, and until the 22. day of *January* following, at
which time she becomes the Morning Star again.

Rye, Wincheisea, Goree, Thames, Rhodes.	11 15

By the help of this Table, and the D's Southing, you may find the time of High-water in any of the Ports specified in this Table, by adding the hours and minutes against the Port, to the hours and minutes of the D's Southing; the aggregate or sum is the hour and minute of the time of High-water at that Port, substracting 12 if your number exceeds it. Having so often explained the use of this Table, I hope it needs no further Explanation.

When the D shines so bright, as to cast a shadow on th Sundial; see where the shadow falls, count how many hour and minutes it wants of 12, and substract that from the time of her Southing that Night, and the remainder is the hour of the Night. If the shadow be upon any of the hours past, add it to the time of the D's Southing, and that is the hour of the Night, substracting 12, if the number exceeds it. If the shadow be on 12, the hour and minutes of the Southing is the time of the Night. I have so often explained each Page and Columne of the Almanack, that I need not do it here again.

Astrological Observations for the Year 1690.

whilst the Superiors angry Powers were bent,
 And streams of poisonous Influences sent.
 Whilst shaveling Monks cry'd up the Good Old Cause,
 And Wolves in Lambskins murdered the Laws
 By a dispensing Power: Whilst Knaves and Fools
 Were woven into Lysse-woolly Tools,
 To gull us of our Liberties and Laws,
 And naked throw us into the greedy Raws
 Of Villanous Monsters void of Humanity,
 Try'd Rogues, and skill'd in all Barbarity;
 Damn'd Teagues and Tories too, that would not start,
 To tear from Mother's womb, the Infants heart, &c.
 Whilst we those Dangers view'd, and trembling stood,
 Ready to launch into a Sea of Blood,
 Heaven heard our Cries, and pitied our Fears,
 Pull'd the high Babel 'bout the Builders ears,
 A Joshua sent, these Giants to withstand,
 And lead us safely into the Promis'd Land,
 Who shed no blood, nor sought he to destroy
 His very Foes; he melted all with joy,
 Without a blow the surliest bands he broke,
 Who his Commands obey'd before he spoke,
 Let's Incense burn to Heaven, then pay our Vows,
 And with blest Laurel deck his Conquering brows.

Of the Winter Quarter.

THis Quarter begins with the ☉'s entrance into the Tropick of vs , which happens this year on Tuesday the 10th day of December, at 13 h. and 45 minut. past Noon; or according to more Vulgar Computation, on the 11th day, 2⁴⁵ minutes past 1 in the Morning. At which time 18 deg. and 18 minut. of ♋ , or the Balance, Ascends the Horizo. and 24 deg. and 20 minut. of ♍ , is upon the Midheav. ♊ is Rampant in the descending part of Heaven, well affected by the ☉, who is also cherished by the Benevolent Rays of ♋ , which gives us great hopes of the

Auspicious

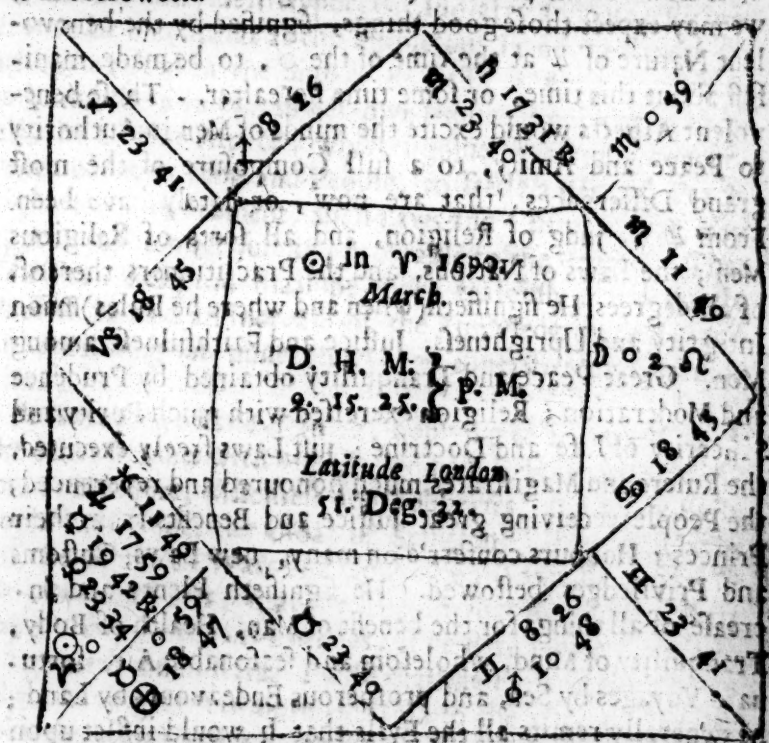

Auspicious Conduct of Affairs in *England*, after our long disturbed and distracted Turmoils, and Tergiversations. We have of late been under the *Quartile* Influences of the two Superiors in *Cardinal Signs*, that hath spent its malevolent upon many Parts of the World in Disturbances, strange and unheard of Revolutions in Empires, Kingdoms, and States. Not to mention any thing more of the unparalleled Revolutions in the *Ottoman Empire*, which I hinted in my last, and at that time durst mention nothing nearer home. At which time the *Laws of England*, so dearly purchased by our Prudent Ancestors, and the Protestant Religion sprung up out of the Ashes and Blood of our Pious and Martyr'd Forefathers, lay trampled upon under the feet of Jesuits, and their wicked Mercenary Accomplices; Till Heaven (in Mercy) heard the cries of the Oppressed; and for his Names sake, and never failing Compassions to his poor distressed Church and People, Inspired the Virtuous and Magnanimous *Prince of Orange*, and his Princess, now our most gracious King and Queen, to adventure their Royal Persons and Interest, to Rescue us, and our Laws, and Religion, from that force it lay under, whose Valour and Integrity, God in his Providence rewarded with answerable Success, and Crown'd their Endeavours with a miraculous *Catastrophe*, and overturning this poor Nations Enemies. For which, let us render thanks to our God, study how to walk answerable to so great a Deliverance; and let us beware of murmuring against God's hand, and his glorious Instruments. Let us labour to outdo each other in Allegiance, Duty and Affection to Their Majesties, and in mutual Love and Charity to one another. As the Season of the Year is unfit for Action, so the Heavens seem to incline Mens minds to Treaties, Embassies, Messages, and Consultations of high Concerns. But towards the latter end of *January*, the two Infortunes oppose each other, and the ☉ and ♀ in *Quartile Aspect* unto them both; so that as-

ter a long Silence and Secret Consultations, no wonder if we hear the noise of Wars and Slaughters: No wonder, if the World be acquainted with the effects of Civil Discords, of Mutual Hatred and Malice. The Ottoman Empire will yet be sensible of these Disorders; and it were well if Europe were, or might be free. These malevolents are in ☐ Aspect to the Triple ☿ of 1682. and 1683. No wonder then, if the ☿ of the Malevolents shall be attended with such eminent Effects ☿ transits the Celestial Sign ☿, which according to the Opinion of Astrologers, is the Horoscope of Ireland, which Kingdom is likely to suffer yet more, according to the heavenly Influences, and so much the more, if it be not by this time Reduced to the Obedience of England. It being at the writing hereof, in a sad and deplorable Condition, lying under the Ravage and Spoil of the Barbarous Irish, and Savage French, against both which God is pouring out his Vials of Wrath, and avenging the Innocent Blood that hath been shed by them; and the cruel and barbarous Usage that his poor Saints and Servants have suffered, for keeping Faith and a good Conscience towards God. The Places more immediately concerned in these evil Influences, are the Places under ☐ and ☿, some of which I shall mention Under ☿, are Russia, Polonia major, Lorrain, Campania, Helvetia, Spitzzerland, Persia, Cyprus, Parthia, Ireland. Cities, Parma, Nantz, Bohemia; Sena, Mantua, Sicilia, Tigur, Tarentum, Lucca, Lipsick. Under ☐, are Norway the higher, Bavaria, Cappadocia, Humea, Catalonia, Barbary, &c. Cities, Gaunt, Messina in Italy, Frankford upon Oder, Valentia, &c. The Countrys and Cities under ☐, are not like to go Scotfree, viz. Italy, Sicily, Bohemia, Alps, Gallia, Togata, Phania, Apuleina, part of Turkey, Samaria, Tartaria, Muscovia, Westphalia, Mosel, Ethiopia, Media, Arabia. Cities, Damascus, Siracuse, Rome, Ravenna, Cremona, Ulms, Prague, Lints, Bristol and Hamborough, Brema, Mosserat, Pifarum, Ingolstadt and Trent, &c. many Places more

more might be named, nor is it to be supposed, that all the Places that are named, shall be subjected to all the evil Influences signified, or all be Sufferers at one time, or in one and the same manner, *Deus Astra regit*, and he disposeth their Influences as he pleaseth.

Of the Spring-Quarter.

THis Quarter commenceth this year by the *Caroline Tables*, on *Tuesday* the 21st of *March*, at 15 h. and 15 m. Afternoon, which is on *Monday* the 20th 15 min. past 3 in the Morning, at which time the *Sun* toucheth the first scruple of the Equinoctial Sign *Aries*. The Position of Heaven is as followeth.

There is so great a difference in Astronomical Tables, in computing the time of the Vernal Equinox, that it is not

safe to give Judgment on the Figure of the Heavens, but rather consider the Radiations of the Erratics among each other, as they are mutually Aspected, and draw a Judgment therefrom.

The first thing that offers it self to view, is the Δ Aspect of the two Superiours, whose welcome Influences will not be ungrateful to the oppressed and distressed part of *Christendom*, who have long lain under the Miseries of War, Flinges, Desolations, Rapines and Bloodshed. Δ is strong, and essentially dignified in the places where he is; h out of essential Dignities, and Retrograde. Δ is swift in motion. Δ is slow. From whence (according to natural Causes) we may expect those good things, signified by the benevolent Nature of Δ at the time of the \odot , to be made manifest about this time, or some time hereafter. These benevolent Aspects would excite the minds of Men in Authority to Peace and Amity, to a full Composure of the most grand Differences, that are now, or lately have been. From Δ we judg of Religion, and all sorts of Religious Men; the Laws of Nations, and the Practitioners thereof, of all degrees. He signifieth (when and where he Rules) much Integrity and Uprightness, Justice and Faithfulness among Men. Great Peace and Tranquility obtained by Prudence and Moderation; Religion exercised with much Purity and Sincerity of Life and Doctrine; just Laws freely executed, the Rulers and Magistrates much honoured and revered; the People receiving great Justice and Benefits from their Princes; Honours conferr'd on many, new Laws, Customs and Priviledges bestowed. He signifieth Plenty and Increase of all things for the benefit of Man, Health of Body, Tranquility of Mind, wholesom and seasonable Air, fortunate Voyages by Sea, and prosperous Endeavours by Land; he generally remits all the Evils that he would inflict upon a People or Nation.

Yet will Saturn, or rather men signified by him, operate closely, subtilly, and with a seeming kind of Moderation, in their Counsels and Projects, but with a malevolent kind of Spirit, in matters Politick and Ecclesiastick, cunningly, and for self-ends, endeavour to subvert and suppress those more sober and honest Intents, endeavoured for the Peace and Tranquility of Kingdoms, Nations, and People. Let Princes beware of these deceitful, sordid, and pernicious kind of Jesuitical Vipers, who will inhabit the Courts of Princes, and endeavour to undermine, deceive, and subvert the most wholesome Purposes, to promote their own Interest and Profit, and advance their Hypocrisy, Idolatry and Superstition. It is to be noted, that at this suspicious Time, the Planet ♄, who is exalted in the Sign of ♊, is in ☾ with ♃, and so is ♀ and the ☿ in ☾, in her own House, applying to them all, by a trine Aspect, which signifieth, a ready concurrence between King and People, to settle a general Peace, righteous Government, such Laws and Customs that may appear to be most just and profitable to the People. That Christian Religion shall be more zealously, and purely Professed, and an increase of the Knowledge thereof; and an abolishing of unnecessary and superstitious Ceremonies.

In June, we have ☿ in ♐, applying to a ☐ to ♃, and the other Planets with him: It signifieth Rebellions, Slaughters or Murders, Mischies and Robberies, and many Evils committed under the Cloak of Religion. If he shall be in ♐, he signifieth Wars and Contentions; and Robberies in the Northern Parts; that the King in that Revolution shall have Victory over his Enemies: If he hath North Latitude, it signifieth much Rain. I wish that the Evils signified by ☿ in ♐, may give no more affliction to the City of London, than the usual and common Calamity of Robbing, Thieving, Clipping and Coining of false Money; such a sort of People will be very active about this time; of which, the careful

careful Magistrates will be watchful; and I doubt not of their Care and Diligence in Suppressing Seditious Persons, and all things that tend to Sedition; and let neither Inhabitants be deluded by the Insinuations and treacherous Designs of the Crafty and Pernicious Jesuits, to fly from their own Mercies, and be perverted from their Obedience and Allegiance to the best of Princes this Nation ever knew; and the best Government (when once settled) that any Kingdom, Nation, or People have been sensible of, since the ungrateful Jews rejected God and his Judges. Under Gemini, are Sardinia, part of Lombardy, part of England, Flanders, Brabant, the Dukedom of Wirtemberg, Hincania, Armenia, Cyrenia, Maritima, Egypt the Lower, Of Cities, London, Corduba, Turin, Versailles, Lovain, Rhegium, Bruges in Flanders, Alençon, Maguntia, Kitzing, Harford, Bamberg, Norimberg, &c. Happy are we, if we make use of those Mercies God hath freely bestowed upon us in this Kingdom, whilst we may take up a woful Complaint, and a sad Lamentation for many of our Neighbour Nations, in the words of the Learned *Spinosa*, 'Oh! how many Changes of Kingdoms? Oh! what sorts and differences of Dangers and Troubles, are to be feared? What unspeakable, great and grievous Villanies? Oh! what turbulent and damnable Seditions? Oh! what unlooked and unhoped for kind of Death? Oh! what exalting of wicked and reprobate Men, the troubled Stars of Heaven do in abundance belch out? What wretched and indigent Persons are every where extolled, and the rich Impoverished and Oppressed? How many Subjects and Servants shall Rule, while Princes and Masters obey, &c. Thus *Spinosa* as Translated by *Elias Ashmole Esq.* I fear this is the fate of too many Kingdoms, whilst we have reason to hope for a growing Prosperity to the Kingdom of England, and her Allies. Poor Ireland hath been in a suffering Condition these two years last past, and I fear they are not yet settled,

nor

nor will they be these several years repaired. France begins to decline; the Glory of that Monarch is shaken by Invasions and intestine Divisions.

Of the Summer Quarter.

THIS Quarter Astronomers always account to begin, when the Sun enters the first Scruple of the Tropical Sign ♋ , and makes our longest day; and it happens this year on Wednesday the 11th of June, at 43 minutes past 4 in the Morning. At which time 8 degrees, and 33 minutes of Pises Culminates upon the Midheaven; and 11 degrees, and 45 minutes of Cancer, ascends the Eastern Horizon, which seems to be beautified with the presence of the glorious Planet Venus, with Mercury accompanying her. We have Aries the Ascendant of England, occupied by the benevolent Planet Jupiter; and the Planet Mars in the Regal House in Trine to him, which hath a very good Signification to England in general: great Glory, Honour and Prosperity to His Majesty, and the Government; with Peace and Tranquility to the People in general. Several Learned and Eminent Men of the Long Robe honoured and advanced; and many Clergy-men for their Piety and Learning, rewarded and exalted. And we have sufficient Ground to predict, at least to hope for good Success of his Britannick Majesty's Arms, wherever employed, and the like to his Allies, which God in his Mercy grant.

We have Mars in a Quartile Aspect to Saturn. Signifieth *Quod erunt multa furta, latrones, & prædones multi & manifesti; & accident populo; anxietates & mala ex parte regum; & ipsi non erunt eis obediētes.* It signifieth many Robberies, eminent Robbers, and Plunderers, publick and audacious; that there shall happen many Oppressions and Evils to the People from their King; and that they shall be Disobedient, and Rebel against him. This Apborsism will probably be verified upon the French King. Saturn is in Scorpio, and Mars in Leo, in Quartile to him, which

which afflicts him both in his Person and Honour; for the Heavens threaten him, and Providence seems to Retaliate and Reward him for the Evils and Mischiefs, with which he hath afflicted all *Europe*; more of this before I conclude. He is threatned with ill Success, and much loss in his Maritime Affairs; that he shall be very unfortunate in his Counsels: that the Jesuits and Priests, shall give him such pernicious Counsel, that shall prove much to his Loss and Damage. Poor *Ireland* seems to labour under a heavy weight of Affliction, or at best, hath not recovered her Strength, but groans under the Losses and Ruins she hath sustained by War, Spoils and Rapiats; *meliora sperata*: *Italy* not in a prosperous Condition, nor is *St. Peter's* Seat an easy Throne. Indeed all the Princes and States of *Europe* are uneasy, all busy and engaged in warlike Enterprizes; the *Scorpion* poison hath inflamed the Blood of the whole Universe; and he that first led the Dance, may in all probability pay the Piper.

Of the Autumnal Quarter.

A Autumnal or Harvest Quarter, commenceth this year on Friday the 11th of September, at 14 min. past 6 at Night; at which time the sun toucheth the first Scruple of the Equinoctial Sign *Libra*, making the Days and Nights of equal Length. At the Ingress 3 deg. and 12 min. of *VS*, is upon the Midheaven; and 8 deg. 27 minut. of *Aries* or the *Ram*, ascends our East Horizon. On which is the Planet Υ , opposed by the Planet $\♂$, and the \odot , which probably may occasion great heat in the Air, engendering Thunder, Lightning, and Storms: Fears and Jealousies among Men, Whispering against, and Calumniating their Superiors, for which some are likely to Suffer. Some Eminent Man of the Long Robe, or one in great Authority questioned or disgraced. Nor will this Quarter pass without some Slaughter or Rencounter; where Armies are near, or Towns besieged, we may expect to hear of more than ordinary

ordinary Actions; probably those places under α , are most likely to suffer. I shall not insert the places under α and γ , for fear I shall prove too Voluminous for my Scantling of paper allowed me.

In *November*, the two Malevolent Planets are in \odot in 23 deg. of m . It presageth great Evils and Disturbances to *Europe*. The Earth and Seas are disquieted with the Alarms of War; many Murthers and Seditions; with all manner of wretched Miseries attending. Mankind generally oppressed with abundance of obnoxious Diseases. The Effects will principally appear the year succeeding, therefore I shall make no further mention of them now. A Great Man in *Europe* is likely to feel the smart of their Malignity, both as to the Health of his Body, and Retrogradation of his Affairs. And because I have so often hinted at him, lest any Artists should think that I do it without Ground, let them consider what follows.

This year the Ascendant comes to the \square of \odot , who is Lord of the 8th and 10th Houses, which imports Danger to his Life and Honour.

	D. M.
Oblique Ascension of the \square of \odot	193 21
Oblique Ascension of the Ascendant	241 59
Arch of Direction is	51 26

Which by *Naibod's Measure of Times*, gives 51 years, and a little more than two Months, which nearly meets this Conjunction of *Saturn* and *Jupiter*. And it is much to be doubted whether the *Sun* to the Body of *Jupiter*, which happeneth almost 2 year before, will stand off, or alleviate the Effects of this. But this we must leave to the dispose of the Almighty, in whose hands are the Lives and Fortunes of all Princes and Peasants.

Astrological Observations, 1690.

*Of the Eclipses, both Solar and Lunar, which happen
this Year 1690.*

There will be two of the ☉, and as many of the ☾; The first will be of the ☉, on February the 28th, to us not Visible; The second of the ☾, on the 14th of March Visible, the Calculation followeth. The third of the ☉, will be on the 24th of August not seen. The fourth will be an Invisible Eclipse of the ☾, on September the 8th day.

			S. A.	48 10
				At

At the time of the middle of the Eclipse, 2 degrees and 43 Minutes of *Virgo* is upon the Midhaven; and 15 degrees and 19 minutes of *Scorpio* upon the Ascendant. *Saturn* in the Ascendant, and *Mars* Lord thereof in *Gemini* in the eighth House in Quartile to *Jupiter* and *Mercury*. *Proclus* saith, That the Moon Eclipsed, *In decem libra primis gradibus, grandines, & fidas alias tempestates provocat.* In the first 10 degrees of *Libra*, it signifieth Hail, Storms, foul Weather, turbulent Winds, violent and harmful Tempests. The Eclipse happening in an Equinoctial Sign, hath relation to the charge of Air; and signifieth Prejudice to the Budding, Sprouting, or Blowing of Trees; and to Herbs springing out of the Ground at that time. It signifieth Controversies in Religion, and some Change and Alteration therein. *Saturn*, as Ruler of the Eclipse signifieth, Diseases of long continuance, by reason of Cold and Deflux of Rhume, as Consumptions and Quartane Agues: Banishments, Poverty, Misery, Death of old Men. Death and Diseases to great Cattel, such as are serviceable to Man. Tempests at Sea, and great Disorders, &c. *Mars* causeth Corruption by too much Dryness; he stirs up Seditions, Tumults, Intestine Risings, Imprisonments, Banishments; the Frowns of Princes towards their rebellious Subjects; some arraigned and suffer Condign Punishment. Tertian Fevers, and acute Diseases, by reason of Corruption of Blood; sudden Deaths to some. Stirs up the Soldiers to Violence, Rapines, Bloodshed, &c. I shall say no more of this Eclipse. The Heavens seem to have a favourable Aspect upon the Kingdom of England, and the Government thereof.

And let us pray, That God may bless Their Majesties our gracious King WILLIAM and Queen MARY, with Health, long Life, and a prosperous Reign. Amen.

Sic in se sua per Vestigia voluitur Annus.

Thus doth the winding of the circling year,
Trace its own footsteps, and the same appear.
The heavenly Train by a standing Law do move,
Whilst all Sublunaries unconstant prove.
Our fleeting Age deceives, and stealing glides,
And the swift Year on loose-rein'd Horses rides.
All things pass on: Those Creatures which are made
Fail, and by Time's assiduate Motion fade.
Much like the running Stream, which cannot stay;
No more can our light hours that pass away.
But as one hillow hastening to the shore,
Impels another, and still then before
Is by the following driven; so we conclude
Of Time, it so flies, and is so pursu'd.
The hours are always new; and what hath been,
Is never more to be perceiv'd or seen:
That daily grows, which had before no ground;
And Minutes pass once, never more are found.
Thus Men on Time's swift wing, unwarily
Pass on, and sink into Eternity.
Let times swift foot move on to contemplate,
And to take care of our Eternal State.
The better we our fleeting Time do spend,
The fitter we to make a pious End.

Amertham, July 27.
1689.
